Mission Statement

The Air Medical Physician Association is an international organization committed to patient-focused, quality critical care transport medicine by promoting excellence in medical direction, research, education, safety, leadership and collaboration.

Congratulations!

Seven positions to serve two-year terms were open to the AMPA 2018 Election. The election winners were announced at the 2018 General Membership Meeting, on October 21 in Phoenix, Arizona. Newly elected Board of Trustee members are:

President:
Brendan Berry, MD, EMT, FACEP  
WakeMed Mobile Critical Care Services

President-Elect:
Ryan Wubben, MD, FAAEM  
University of Wisconsin Med Flight

Secretary-Treasurer:
Doug Swanson, MD, FACEP, FAEMS  
Med Center Air/Carolinanas Medical Center

Board Members at Large:
Douglas J. Floccare, MD, MPH, FACEP  
(one-year term)  
MIEMSS/Maryland State Police  
Samantha W. Gee, MD  
Nationwide Children’s Hospital  
Critical Care Transport Team  
Michael A. Jasumback, MD  
PHI Air Medical
Benjamin Lawner, DO, MS, FACEP  
Allegheny Life Flight

Board members who continue in their term of service are Lauri Bolton, MD (Immediate Past President), and Board Members at Large, Steven Bott, MD; Steve Hancock, MB ChB, MRCP, DCH, FRCPCH; Benjamin Nicholson, MD, NRP - non-voting Resident Member; Charles W. Sheppard, MD

Thank you to all Board Members for volunteering their energy, creativity, and enthusiasm to AMPA.
As physicians, we are the clinical leaders of our transport programs, and we have the opportunity to share our knowledge and ideas with our crews to impact clinical care across our service areas. As AMPA members, we have the opportunity to share our knowledge and ideas with each other to impact clinical care around the world. Discussions at the Medical Director Core Curriculum, at the Air Medical Physician Symposium, and online at the AMPA Discussion Forum are all ways our members can interact and learn from each other. AMPA’s virtual connections are unfortunately not very well utilized at this point, and our leadership is working on ways to help us better connect with each other.

Many of our members also share their knowledge and ideas with critical transport practitioners across all disciplines at CCTMC and AMTC, influencing clinical care around the world. AMPA leadership recently called for more physicians to volunteer their expertise at these conferences, and we greatly appreciate those who are already submitting presentations. We also understand the disappointment and frustration associated with not being accepted, but we hope that growing the pool of physician submissions will also grow the number of physician presentations, maximizing our impact on clinical care around the world.

And don’t forget to remind your crews to register for CCTMC19!

Best regards,

Brendan Berry, MD, EMT, FACEP
President
Air Medical Physician Association

**AMPA Distinguished Physician:**

The Air Medical Physician Association Distinguished Physician Award was established in 1993 to recognize a physician who has significantly contributed to the air medical profession, and to recognize lifetime achievement and service to the air medical community. Recipients are nominated by their peers and selected by the Board of Trustees.

This year’s Distinguished Physician began his career in transport medicine in the 1970s transporting patients referred to the Royal Alexandra Hospital for Children. During this time he contributed to establishing basic equipment for transport, staffing, and coordination with outside facilities.

Staring in 1985 he had a key role in the development of a statewide perinatal service network and ultimately the formation of an integrated pediatric and neonatal emergency transport service (NETS) for which he is still a consultant and State Director.

He has numerous publications spanning the decades of his experience. He has spoken both nationally and internationally on neonatology and critical care transport. He is active in multiple professional societies. He has been an AMPA member since 2007, and has served on the Board of Trustees.

This year’s Air Medical Physician Association Distinguished Physician is **Andrew Berry, AM MB BS, FRACP** - NETS/Child Flight, Inc. - Australia
The Air Medical Physician Association Medical Director of the Year is awarded to a physician who has made outstanding contributions to their program. Nominations for this award come from the staff of individual programs and the Board of Trustees selects the recipient. This year’s recipient encourages team members and assistant medical directors to contact him 24/7 with questions or concerns. He has a willingness to work through problems to reach the best solutions for patients, team members, and the transport program. Education and research are two of his passions. He combines his education, experience, knowledge of emerging research, and industry best practice to ensure his program is providing high quality care that meets or exceeds current standards. His enthusiasm for high quality, patient-centered medical transport is contagious. Team members recognize him as a resource and a leader in the industry and feel privileged to have him as their medical director. He has been an AMPA member since 2006.

This year’s Air Medical Physician Association Medical Director of the Year is David P. Thomson, MS, MD, MPA, FACEP, FAEMS, FAsMA, CMTE – East Carolina University, Vidant EastCare.

Did you know.....

Most of those who attended the October, 2018 Medical Director Core Curriculum and AMPS conferences in Phoenix were AMPA members, between 31-40 years of age. They first heard about AMPA from a colleague, and have on average been an AMPA member for five years or less. The majority are USA emergency medicine physicians who have been a medical director five years or less, and most spend 5-10% of their time on medical direction or critical care medical transport activities. Their transport programs are CAMTS or EURAMI certified. These members have attended the conferences primarily to network, or increase their education and felt that the topics covered were more important to them than the location of the meeting or the number of CME awarded. Most did not need approval to attend the meetings, and the registration fees were covered by their hospital and/or transport program, or they paid themselves. Most felt that what they learn at AMPA conferences has been incorporated into their practice, and have made a positive difference in their program’s effectiveness and patient care outcomes. Most attendees have attended all three parts of the Medical Director Core Curriculum. Attending the AMPA Medical Director courses were more valuable to them than attending AMTC or CCTMC. The majority also felt that they would benefit by a Medical Director Certification.

(Information obtained from Entrance Surveys completed by October 20 and 21, 2018 conference attendees).
Welcome to new AMPA Members!

July, 2018

New AMPA Membership Category

The AMPA Board recognizes that for physicians outside of North America, an AMPA membership is significantly more expensive than professional memberships with other organizations they might join. In an effort to support and foster more involvement from our international colleagues, a change has been made in our dues structure to be more welcoming to the Non-North American physician member. Beginning January 1, 2018 the annual dues for this category is $200.00 USD. Please encourage your non-North American colleagues who have had to let their AMPA membership lapse due to cost, that a change has been made and to rejoin.

Highlighting AMPA International Members:

Steve Hancock is AMPA’s International Board Member and he has been reaching out to the 30 physicians who reside outside North America in an effort to showcase their air medical transport experience. Our first spotlight is on AMREF Flying Doctors.

---

An Air Ambulance Service in Africa
Africa is the world's least developed continent. 70 to 80% of the population lives in rural areas where medical facilities are inferior and scarce. Emergency
Medical Services depend by and large on the private sector. To operate an Air Ambulance service successfully is challenging, with conflict zones, cross-border operations, politics and bureaucracy posing major hurdles. Gaining flight clearances can be cumbersome; clearing customs and immigration a nightmare. Adding terrorism, tribal clashes, drought, famine and corruption into the equation turns every day in the operation of an African air ambulance company into an adventure.

Based in Nairobi, Kenya, AMREF Flying Doctors (AFD) operates in a region of five million square kilometres, roughly the size of Western Europe, with over 130 million inhabitants and on average only 10 physicians per 100,000 people. From the original outreach flights over 60 years ago that brought specialist surgical skills to remote hospitals in the East African region, the company has grown into a world class air ambulance service that is EURAMI accredited and evacuates thousands of patients from and to destinations all over the globe. Patients’ medical conditions range from trauma due to road accidents, war or violence related circumstances to infectious diseases, cardiovascular conditions, paediatric emergencies and gynaecological complications.

The heart of the operation is the 24hr Emergency Control Centre at Wilson Airport in Nairobi with fulltime medical staff and aircrew. A Volunteer Physician Programme allows experienced Emergency Physicians from around the world to work with AFD on a voluntary basis.

With a fleet of short and long range aircraft including 2 Pilatus 12, 1 Beechcraft King Air, 1 Cessna Citation XLS jet and a Cessna Citation Bravo jet, AFD is able to access remote bush airstrips as well as repatriate patients by jet air ambulance to other continents, including countries as far away as China and Australia. Forced to land on remote, uncontrolled bush strips, AFD’s pilots have to be highly skilled and experienced to ensure the safe retrieval of patients from remote areas after dark, where the landing is only guided by car headlights at the end of a dirt runway. AFD is also known for its professionalism and expertise in successfully extracting patients from conflict zones like Somalia, South Sudan or Congo.

NGO’s, Diplomatic missions and government agencies also count among AFD’s wide clientele. To make the expensive air evacuation services affordable to the local population, AFD developed low price annual and temporary membership schemes, through which members are covered for medical air evacuation free of charge within Eastern Africa, including South Sudan and Ethiopia. Throughout the journey, AMREF Flying Doctors never forgot its roots and has always remained committed to serving disadvantaged communities. Un-utilised membership fees contribute to AFD’s Charity Evacuation Programme, airlifting the poorest of the poor free of charge to medical facilities where their lives can be saved.

Any surplus generated by AFD supports Amref Health Africa’s humanitarian work and is crucial in helping the organisation to achieve its ongoing mission of lasting health change in Africa.

Dr. Bettina Vadera
AMPA Member since 2008
Chief Executive & Medical Director, AMREF
P.O.Box 18617 - 00500 Nairobi/ Kenya
Wilson Airport, Langata Road

Watch the AMPA website www.ampa.org and your mailbox for the CCTMC 2019 brochure! CCTMC always promises excellent clinical education for the critical care transport medicine provider......and they deliver!

April 15-17, 2019
Hotel Albuquerque at Old Town
Albuquerque, New Mexico

AMPA Activities:
Sunday, April 14, 2019 -
Critical Care Procedural Anatomy Program with morning didactic lectures following by a procedures lab.

**Monday, April 15, 2019**

**Ultrasound Lab - 8:00 a.m. to Noon**

This half-day course will include lectures on ultrasound basics and how to perform the eFAST (extended focused abdominal sonography for trauma - adds lung sliding assessment to the standard FAST exam) along with hands on lab time. Don't miss this opportunity!

**1:00 p.m. Opening of the Critical Care Transport Medicine Conference - General Session**

**Educational Objectives:**

**At the completion of this conference participants should be able to:**

- Use state-of-the-art information to enhance and influence their clinical practice in the critical care air and ground transport environment, increase their skills, and influence their awareness of the unique environment in which they deliver medical care.
- Discuss the most common complications/medical emergencies seen in cf-LVAD patients and specific management strategies for each; compare and contrast TTE and TEE; and review the love affair with the lactate.
- State the predictive value of 'difficult airway prediction' tools; describe current and future tools in shock assessment; and state the current best practice strategies for identifying pulmonary embolism in critically ill patients.
- Apply the hacker mindset to solve common, vexing problems faced in HEMS / CCTM / PHARM jobs; define high reliability; and describe the effects that committing an error will have on you and your career.
- Describe how the brain works in stressful situations; identify the fallacy in reductionism and the simplicity of failure; and recognize team dysfunction in the setting of high reliability organizations.
- Describe and analyze the utility of VL as compared to DL in terms of providing airway management in the field and the supervision thereof; identify situations in which volume resuscitation may be detrimental; and discuss the criteria and challenges of whole blood use in aeromedical transport.
- Discuss the presentation and toxidromes of a patient that has overdosed on Beta and Calcium Channel Blockers; describe how to choose fluid type and amount based on evidence; and identify conditions that do not respond to frontline treatments.
- Recognize and treat most common causes of Pediatric Bradycardia; review the clinical findings associated with TBI in the pediatric patient; discuss Placenta Abrupto and Placenta Previa, and common causes for obstetric DIC.
- Discuss the relevance of anion gap acidosis to transport medicine; define patient populations at high risk for deterioration during intubation; and relate an algorithm to quickly manage hypotensive, hypoxic and acidotic patients in the peri-intubation period.
- Highlight the controversies in mechanical circulatory support, including the evolving role of the intra-aortic balloon pump, right-sided MCS devices; and ECMO indications and contraindications

**NEW!!!**

**CCTMC SIMULATION PROGRAM - BREAKOUT III**

**Tuesday, April 16, 2019 - 8:15 AM - 4:30 PM**

60-minute session - **Foundations of Simulation in Healthcare**

This session will focus on understanding the foundational principles in simulation. We will discuss why simulation is effective, what educational theories are routinely utilized, and how to make your students successful.

60-minute session - **Building a competency-Based simulation program**

In this session competency-based assessment and its tools will be discussed, and we will focus on how to build your educational curriculum around competency-based learning.

90-min session - **Establishing the ground rules. What briefing, prebriefing, and debriefing really mean.**
This session will focus on the components of a successful simulation experience. Prebriefing, briefing, the simulation experience, and debriefing will be discussed.

90-minute session - Simulation and Competition-Based Learning. Is there such a thing? This session will focus on how to utilize simulation and educational methodologies to create a competition type environment. We will discuss and develop the tools, set the stage, and layout what is needed to ensure you create a unique, but impactful environment.

Please support this educational effort of AMPA and the Air & Surface Transport Nurses Association, and the International Association of Flight & Critical Care Paramedics. The CCTMC is known for quality critical care transport education and AMPA is proud to be a founding partner. CCTMC celebrates 27 years in 2019!

Call for Abstracts
Lauri Bolton, MD

Critical Care Transport Medicine Conference - April 15-17, 2019
Albuquerque, New Mexico

The Critical Care Transport Medicine Conference (CCTMC) will once again feature a Scientific Forum with poster presentations of original scientific research. Poster presentations will be formally judged during the conference on April 15th and an Outstanding Research Award will be bestowed to the best research presentation. Accepted abstracts will be published in the Air Medical Journal. Abstracts presented at other meetings during 2018-2019 will be considered. If abstracts have been published prior they will not be republished in the Air Medical Journal. Our goal is to nurture and provide an appropriate forum for research in air medical transport.

Deadline: Friday, March 8, 2019
5:00 p.m. EST

Abstracts must be sent as E-mail attachment in MS Word format (Macintosh or Windows) without names or institutions listed. Objective, methods, results and conclusion sections should be included, 3200 maximum number of characters allowed (including spaces). Use single line spacing. Leave one line of space between paragraphs. Left justify all text. Word documents should have 1 inch margins, and text in Times font, 12 point size. Please use the "word count" feature under "Tools" in Word. The E-mail cover should list names of participants in the study, institutional affiliations, funding sources, and identify the person who will present the poster at the conference*. In addition, the E-mail cover must state whether or not the abstract has been or will be presented and/or published prior to April 2019. The reference must be supplied. Submissions should be sent to Dr. Lauri Bolton at Lauri.bolton@hhchealth.org and must be received by 5:00 p.m. EST on March 8, 2019.

*Travel expenses and CCTMC registration are not covered for the person presenting the abstract(s) at CCTMC.

AMTC 19

November 4-6, 2019
Atlanta, Georgia

SAVE THESE DATES!!!

November 2, 2019
AMPA Medical Director Core Curriculum: Part III
November 3, 2019
3rd Annual AMPS Conference
Air Medical Physician Association (AMPA)  
Research Seed Grant

Overview:
An increasing number of young physicians are experiencing difficulty finding the resources and support to do research. Consequently, fewer physicians are choosing careers in research, which is a terrible loss to medicine. Subsequently, there are fewer individuals providing meaningful scientific contributions specific to the air medical industry, air medical transport, or prehospital transport.

To address this trend, AMPA established the Air Medical Physician Seed Grant Research Program in 2011 to encourage medical students, physician residents, and fellows to enter the research field. The program provides a $2,000 (US dollars) grant to help him/her conduct small basic science, applied, or clinical research projects. These funds will round out new project budgets, rather than sustain current initiatives. These funds will favor research in air medical or prehospital transport.

Grant application and information:
AMPA is currently accepting applications for the 2018-19. The application **deadline is March 26, 2019**, and the recipient will be announced in April. The grant period and project duration is up to one year from the date of the grant check. Download a grant application at [www.ampa.org](http://www.ampa.org).

Eligibility and funding restrictions:
Seed grant funds cannot be used for salary or stipend, indirect/administrative costs, or solely for travel expenses. Seed grants will not be awarded to any trainee applicant who has previously received an AMPA seed grant though research advisors are eligible to reapply with different trainees. Applicants must be a medical student, physician resident or fellow working with an AMPA active member mentor. Projects should be applicant-conceived, rather than ongoing research of their mentor or Principal Investigator. Forms should be sent to the AMPA office via peter1111@aol.com. Download a Final Report Form at [www.ampa.org](http://www.ampa.org).

AMPA Research Seed Grant Recipients

**2011 Research Seed Grant recipients:**

"Cost-Benefit and Cost-Effectiveness of HEMS STEMI Transports"
Miranda Phillips, DO - Principal Investigator; Stephen H. Thomas, MD, MPH - Advisor/AMPA Member - University of Oklahoma, School of Community Medicine, Department of Emergency Medicine, Tulsa

"The Ornge Comparison of Tracheal Occlusion Pressures to Ensure Safety (OCTOPUS) Trial"
Matthew Turnock - Principal Investigator; Russell D. MacDonald, MD, MPH, FRCP – Advisor/AMPA Member - Department of Emergency Medicine, University of Toronto, Ontario, Canada

**2012 Research Seed Grant recipient:**

"The Use of Non-Invasive Hemodynamic Monitoring in Flight"
Adam Darnobid, MD - Principal Investigator; Marie Mullen, MD - Advisor/AMPA Member - Department of Emergency Medicine, The University of Massachusetts Medical School

**2013 Research Seed Grant recipient:**

"Characterizing Care of Sepsis Patients Requiring Critical Care Transport in British Columbia"
Wilson Wan, MD - Principal Investigator; Eric Vu, MD, CCP, FRCP - Advisor/AMPA Member - Department of Emergency Medicine, University of British Columbia, Vancouver, Canada

**2014 Research Seed Grant recipient:**

"Education of Pediatric Subspecialty Fellows in Transport Medicine"
Geoffrey Mickells, MD - Principal Investigator; Ranna Rozenfeld, MD - Advisor/AMPA Member - Division of Critical Care Medicine, Ann & Robert H. Lurie Children's Hospital of Chicago, Illinois.

**2015 Research Seed Grant recipient:**

"Utilization of a Standardized Pre-Procedure Checklist to Prevent Clinician Error and Improve Patient Outcomes in Pre-Hospital Critical Care Airway Management"
David Wilcocks, MD - Principal Investigator; Debra Perina, MD - Advisor/AMPA Member - Department of Emergency Medicine, University of Virginia, Charlottesville, Virginia.

**2016 Research Seed Grant recipient:**

"Enhancing Patient Safety in the Critical Care Transport Environment: Use of portable ultrasound to confirm accurate endotracheal tube placement and prevent unrecognized tube migration"
Benjamin Nicholson, MD, NRP - Principal Investigator; Harinder Dhindsa, MD, MPH - Advisor/AMPA Member -
Department of Emergency Medicine, Boston Medical Center, Massachusetts; VCU Health, Department of Emergency Medicine, Richmond, Virginia.

2018 Research Seed Grant recipient:
“Pre-Hospital Focused Assessment with Sonography for Trauma (FAST) and Time to the Operating Room (OR)”
Hani I. Kuttab, MD – Principal Investigator; Ira Blumen, MD – Advisor/AMPA Member – Department of Emergency Medicine, University of Chicago, Illinois.

CONGRATULATIONS to these researchers!

AMPA CORE CURRICULUM

The Medical Director Core Curriculum is offered as a conference preceding the annual Air Medical Transport Conference (AMTC). The AMPA Board of Trustees determined at the April 2003 Board meeting that offering a core curriculum process is relevant to the success of physicians managing critical care air and ground medical transport teams. The Core Curriculum is offered in three parts, which do not need to be taken consecutively, and cover topics from Principles and Direction of Air Medical Transport, a publication of AMPA. The sessions will be of interest to physicians just starting as medical directors, as well as those who are experienced. The conference also offers an opportunity for physicians to network and presents a forum for interactive discussion. The AMPA Medical Director Core Curriculum is recognized and recommended by CAMTS as background training for a Medical Director of a critical care transport program that is applying for accreditation or undergoing reaccreditation.

Watch for future changes in the Core Curriculum process as the AMPA Board is looking to streamline the course so it can be offered online.

Past courses include:
Part I: November 2, 2003 – Reno, Nevada
October 23, 2005 – Austin, Texas
October 19, 2008 – Minneapolis, MN
October 16, 2011 – St. Louis, MO
September 21, 2014 – Nashville, TN
October 14, 2017 – Fort Worth, TX

Part II: April 12, 2004 – San Antonio, Texas
September 24, 2006 – Phoenix, AZ
October 25, 2009 – San Jose, CA
October 21, 2012 – Seattle, WA
October 18, 2015 – Long Beach, CA
October 20, 2018 – Phoenix, Arizona

Part III: October 24, 2004 – Cincinnati, Ohio
September 16, 2007 – Tampa, FL
October 10, 2010 – Ft. Lauderdale, FL
October 20, 2013 – Virginia Beach, VA
December 12, 2016 – Charlotte, NC

The following 197 physicians have completed the Core Curriculum Series. CONGRATULATIONS to all!

Mark Ackrell, MD
Alpha Star Aviation – Austin, Texas

Paul Adams, DO
National Air Ambulance, Fort Lauderdale, FL

Azeemuddin Ahmed, MD
University of Iowa AirCare – Iowa City, Iowa

Isaac J. Akanko, MD
West African Rescue Association, Ghana

Lynthia Andrews, DO
Life Net – St. Joseph-Platte City, Missouri

Steven S. Andrews, MD
North Memorial Ambulance Service – Robbinsdale, Minnesota

Grace M. Arteaga, MD
Mayo Clinic/St. Mary’s – Rochester, Minnesota

David Baker, MD
Airlift Northwest, Seattle, Washington

Kevin S. Barlotta, MD
UAB Critical Care Transport, Birmingham, Alabama

Edward Bartkus, MD
IU Health Life Line – Indianapolis, Indiana

Craig Bates, MD
Cleveland Metro Life Flight, Cleveland, Ohio

William Beninati, MD
Intermountain Life Flight – Salt Lake City, Utah

Andrew Berry, MD
NETS-NSW, Sydney, Australia

Brendan Berry, MD
WakeMed Mobile Critical Care Services, Garner, North Carolina

Ira J. Blumen, MD
UCAN – Chicago, Illinois

Michael Bohanske, MD
Air Care & Mobile Care – Cincinnati, Ohio

Lauri Bolton, MD
LIFE STAR Hartford Hospital, Connecticut

Asher Brand, MD
PHI Air Medical, Waynesboro, Virginia
